

I am one of the thousands of XM radio subscribers that benefits from listening to XM Satellite Radio's traffic and weather channels. Satellite radio provides me a variety and quality of programming choices that are not available from standard broadcast means. I pay for these services. The National Association of Broadcasters should not be allowed to dictate what I am permitted to hear from a service that I pay to receive. I urge the FCC to reject the NAB's petition 04-160 and to support XM radio's ability to provide me the kind of programming and services I wish to pay for.
